To enhance system reliability, Graham County Electric Cooperative, Inc. (GCEC) has partnered with Sundance Power Pole Inspections, Inc. (Sundance PPI) to test and inspect power poles and overhead electrical facilities in the areas listed below.

This project will start Dec. 2025 and is expected to be completed by April 2026. The crews will need access to all GCEC poles and equipment to carry out this work. Providing easy access to your property will help the crews work safely and efficiently.

Sundance PPI crews will wear safety shirts and vests featuring the Sundance PPI logo (as shown in the upper right corner of this notice) and will carry identification badges. They will access equipment by foot, truck, or ATV, depending on conditions, and will attempt to contact you before entering your property. Please inform us of any potential hazards or special conditions related to your property so we can arrange for safe access.

Thank you for your patience and cooperation as we complete this important project.

If you have any questions or concerns regarding this project, please feel free to contact me at 928-485-8674 or via email at rsherman@gce.coop.

AREAS SITED FOR INSPECTION

Circuit 3100 – North of Gila River, Talley to Airport Rd

Circuit 3000 – North of Gila River, Talley to Bryce
